

**Professional Development Training: Tools and skills
to help a client with substance use-related problems**

SBIRT & MI Training

(Screening, Brief Intervention, and Referral to Treatment & Motivational Interviewing)

Cost-Free Training (Pre-registration is required, see attached form)

This one-day training is free and is open to all interested staff from regional trauma centers, emergency departments, and primary health/mental health care centers, including: physicians, trauma program managers, nurses, nurse practitioners, health educators, injury prevention coordinators, medical social workers and other mental health professionals, substance use disorder treatment professionals, college- and university-based student assistance program staff, and Employee Assistance Program (EAP) staff.

Screening, brief intervention, and referral to treatment are effective in a variety of settings. Its effectiveness has been proven particularly in hospital emergency departments and trauma centers treating individuals with alcohol-related injuries. SBIRT has also been shown to be effective in primary care settings, where it is incorporated into other routine medical assessments such as measuring blood pressure. A major focus of the daylong training is on a detailed review of key motivational interviewing concepts and principles that are tied to effective use of the FLO (Feedback; Listen and Understand; Options Explored) brief intervention. Core clinical components that will be covered include: (1) screening procedures to identify risk; (2) brief intervention to raise awareness of risk and motivate change; and (3) referral to treatment for patients with more serious substance use-related problems.

At the conclusion of this activity, participants will be able to: (1) Describe the background and rationale for conducting SBIRT in a variety of health settings; (2) Explain how to utilize screening procedures to identify patients engaged in at-risk substance use behaviors; and (3) Demonstrate a three-step motivational interviewing-based brief intervention strategy to motivate patients to change their at-risk behavior and/or seek treatment.

Monday, September 29th, 9:00 am – 4:30 pm

Registration will begin at 8:30 am and the training will begin **promptly** at 9:00 am with an hour lunch break.

Sierra Nevada Memorial Hospital

Outpatient Center, 2nd Floor Conference Rooms

(Morning refreshments and lunch provided)

Continuing Education

This training meets the qualifications for the provision of 6.0 continuing education credits/contact hours (CEs/CEHs). UCLA Integrated Substance Abuse Programs (ISAP) is approved by the American Psychological Association to sponsor continuing education for psychologists. UCLA ISAP maintains responsibility for this program and its content. UCLA ISAP is also an approved provider of continuing education for MFTs and LCSWs (CA BBS, #PCE 2001), CADCs (CCBADAC/CAADAC, #2N-00-445-1115), CATCs (ACCBC/CAADE, #CP 20 903 C 0816), CASs (BCAS/CAARR, #5033), and RASs (Breining Institute, #CEP060411449-ULA-HE). Provider approved by the California Board of Registered Nursing, Provider #15455, for 6.0 contact hours. The Morehouse School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. The Morehouse School of Medicine designates this live activity for a maximum of 6.0 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity.
